1. Get /rewards

a. When both id and list of months not provided

Expected: Return rewards for each month and total rewards for each customer

Request:

The screenshot shows a REST client interface for the GET /rewards endpoint. The description states: "Retrieves total rewards of each/all customers for all/specified months". Under the "Parameters" tab, there are two query parameters: "months" (array[string], query) with a dropdown menu showing "JANUARY", "FEBRUARY", and "MARCH"; and "customerId" (integer(\$int32), query) with a text input field containing "0". There are "Execute" and "Clear" buttons. Below the parameters, the "Responses" section shows a cURL command:

```
curl -X 'GET' \
  'http://localhost:8080/rewards?customerId=0' \
  -H 'accept: */*'
```

Response: [{
